

Here's an electrician's tool that's guaranteed to save you time, save on labour cost, and make you money, ***instantly*** ... Or Your Money Back

Would you like to wire your jobs 20% faster?

Smart electrical contractors throughout Australia have been using a new cable roller that is making it so much easier to wire buildings, increasing their levels of production and safety.

The new **Roll-A-Rex** cable roller has removed a lot of the frustration of handling cables rolls. No longer do you have to put up with cable rolls falling on the ground, getting caught up, having to pull around corners, or having two men on jobs when you only need one.

Electricians have been amazed with the ease in which this machine has transformed their cable handling duties. Huge increase in productivity and decreased back injuries has contributed to the overwhelming success of this machine.

Handling heavy & awkward cable rolls has been the result of countless lower back problems, which could have been avoided with the appropriate equipment. There's no need to be frustrated any longer.

30 DAY MONEY BACK GUARANTEE!

Put the Rex to the test. Push it to its limits, compare & scrutinize this compact cable roller, & if it isn't the most time saving, universal cable roller that caters for all your needs then please return it for a full refund.
